VERTICAL SLIDING SASH WINDOWS

Timeless elegance meets
modern performance

TIMELESS ELEGANCE MEETS MODERN PERFORMANCE

With our Timeless Vertical Slider range, we have taken something great and made it even better. We've retained all the traditional charm and have added all the modern benefits.

Timeless Vertical Sliders build on the beauty and elegance of the traditional sliding sash window by adding the high performance, security, durability, low maintenance and energy efficiency you expect of modern uPVC window design and manufacture. What sets Timeless Vertical Sliders apart is attention to detail – the attention to the little details that create that wow effect – the sculptured shape, Georgian or Astragal bars, sash horns, crafted traditional furniture, woolpile draught excluders, authentic woodgrain finishes.

- 128mm outer frame profile
- Large window spans up to 1.4m x 2.4m
- Low-line concealed gaskets
- Slide and tilt facilities

That same attention to detail has gone into the design and manufacture of the Timeless range. With Timeless Vertical Sliders, the days of the draughty, leaky, high maintenance, low security sliding sash window have been consigned to the past. In their place, you get the benefits of over 30 years' expertise in creating high performance windows – precision engineering for maximum strength, durability and weather performance, advanced profile design and high performance glazing that help create an A-rated window as standard, modern gearing and operating mechanisms that create optimum usability and high security locking systems for total peace of mind.

For greater convenience and flexibility, Timeless Vertical Sliders feature both a slide and tilt opening capabilities

Sliding Facility - top and bottom sashes can be moved vertically and held in the required opening position and operated individually or simultaneously – the ideal solution for maximum ventilation.

Tilting Facility – with the sashes in their chosen position, the sashes can be tilted in towards the room – perfect for ease of cleaning, safety and extra ventilation.

SECURITY & DURABILITY

Timeless Vertical Sliders are manufactured from a 128mm heavy-set, steel reinforced profile system for outstanding strength, durability and mechanical performance and allows for the production of window sizes of up to 2.4m wide by 1.4m high. A continuous cill option is available for multi-frame designs.

Both sashes in the window are fitted with advanced gearing and locking systems to provide maximum security. To further enhance safety and security, tilt restrictors and child restrictor are available.

- 'A' rating as standard
- 128mm, steel reinforced profile
- Advanced safety and security features
- Low maintenance
- 10 year performance guarantee

ENERGY PERFORMANCE

The Timeless range has been designed to meet the sustainability demands of the current climate by reducing energy emissions. The multi-chamber profile system, coupled with high performance glazing units produces outstanding energy performance. Timeless Vertical Sliders are fitted, as standard, with high-performance energy reflecting, coated double glazing which provides whole window U-values of 1.4 W/m²K, and an 'A' rating. All glazing units feature high-performance coated glass, which reflects internal energy back into the home and transmits solar energy from outside.

WEATHER PERFORMANCE

Manufactured from premium grade PVCu, Timeless Vertical Sliders require minimal maintenance and are guaranteed to retain their colour, shape and performance, and will not rot, warp or need regular painting, whatever the weather throws at them.

QUALITY GUARANTEED

For peace of mind, Timeless Vertical Sliders are backed by a 10 year performance guarantee.

CHOICE, CHARM AND CHARACTER

Eye-catching, beautiful and crafted with care, Timeless Vertical Sliders are tailor-made to your individual style and requirements - from size and configuration to colour and finish; furniture and hardware to personalised decorative options. What they all have in common is the ability to create the perfect look for your home and enhance its charm and character.

FURNITURE AND HARDWARE

To create an authentic look and feel, a range of traditional sash window furniture is available including ring pulls and handles, decorative tilt latches and 'catch & keeper' style locks. Sash furniture is available in silver, gold and white.

DECORATIVE OPTIONS

For an enhanced period-style look decorative sash horns are available as a clip-on accessory or as a fully-ingetrated run through option. A range of Georgian or Astragal bar options and shaped heads are also available to further personalise your windows.

- Sculptured, Ovolo design
- Range of foiled finishes
- Georgian/Astragal bar options
- Traditional hardware
- Run through sash horns available

COLOUR AND FINISH

Vertical Sliders feature a sculptured profile finish, recreating the elegant, curved appearance of a traditional sash for a stunning and eye-catching look. Choose from classic-white or a stunning woodgrain-effect foiled finish in oak, black, cream and whitegrain. Unlike painted sashes, our foiled finishes are highly durable and won't peel, fade or crack over time.

“*We never compromise on quality*”
