Flat roof light

NEW
2020
Roof Light

The flat roof light is suitable for modern new build properties, extensions or refurbishment projects. It is the modern, practical way of allowing natural light to flood into your home, providing a feeling of space.

Our factory glazes every roof light with clear toughened double glazing, in either a blue or neutral tint, offering excellent weathering properties to keep your home warm. This means that your room will remain at a comfortable temperature for use throughout the year.

The roof light is suitable for flat roofs and is fitted with a minimum of 5° rake. Our roof light is easy to install and carries a 10 year guarantee for your peace of mind.

Simply choose the size of your frame and the glazing tint and we will manufacture a bespoke roof light for your project, to maximise the use of light and space within your home.

*Where our roof light weighs over 75kg, glass will be supplied loose with a structural bonding kit and instructions.

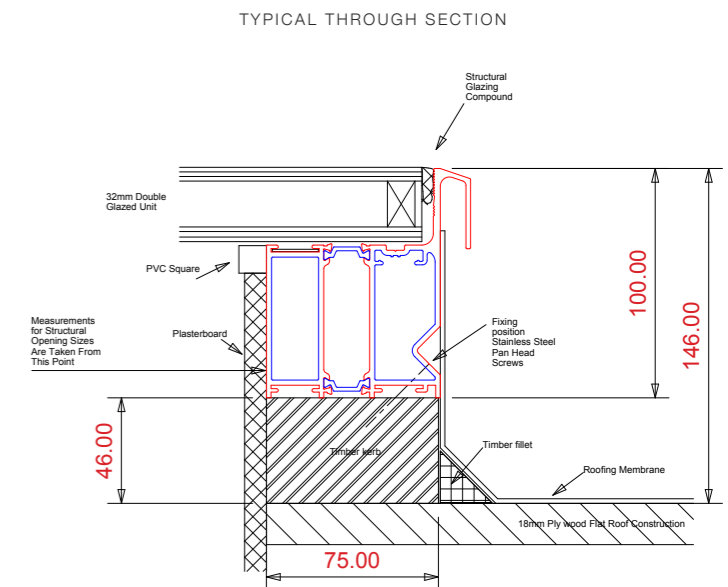

Key features

- Colour: Anthracite grey inside and out
- Excellent thermal properties to keep your home warm
- Made to your bespoke sizes
- Up to 1.5m wide and 2.5m long
- Double glazed
- Easy to install
- 10 year guarantee

Options

- Solar control glass with a blue or neutral tint

Please note that the roof light has to be set on a minimum 5° pitch in order to allow water to drain off the surface of the roof and prevent pooling.

Our Lantern Roof is the slimmest, strongest, most thermally efficient Lantern Roof in Europe, giving you the ultimate experience of light and space in your home with magnificent aerial views.

We offer solutions for all property types; from sensitive period buildings in conservation areas, spas and atriums, to modern new build properties, extensions and refurbishment projects. you choose the frame colours, glass tint and roof size to suit your property, we do the rest.

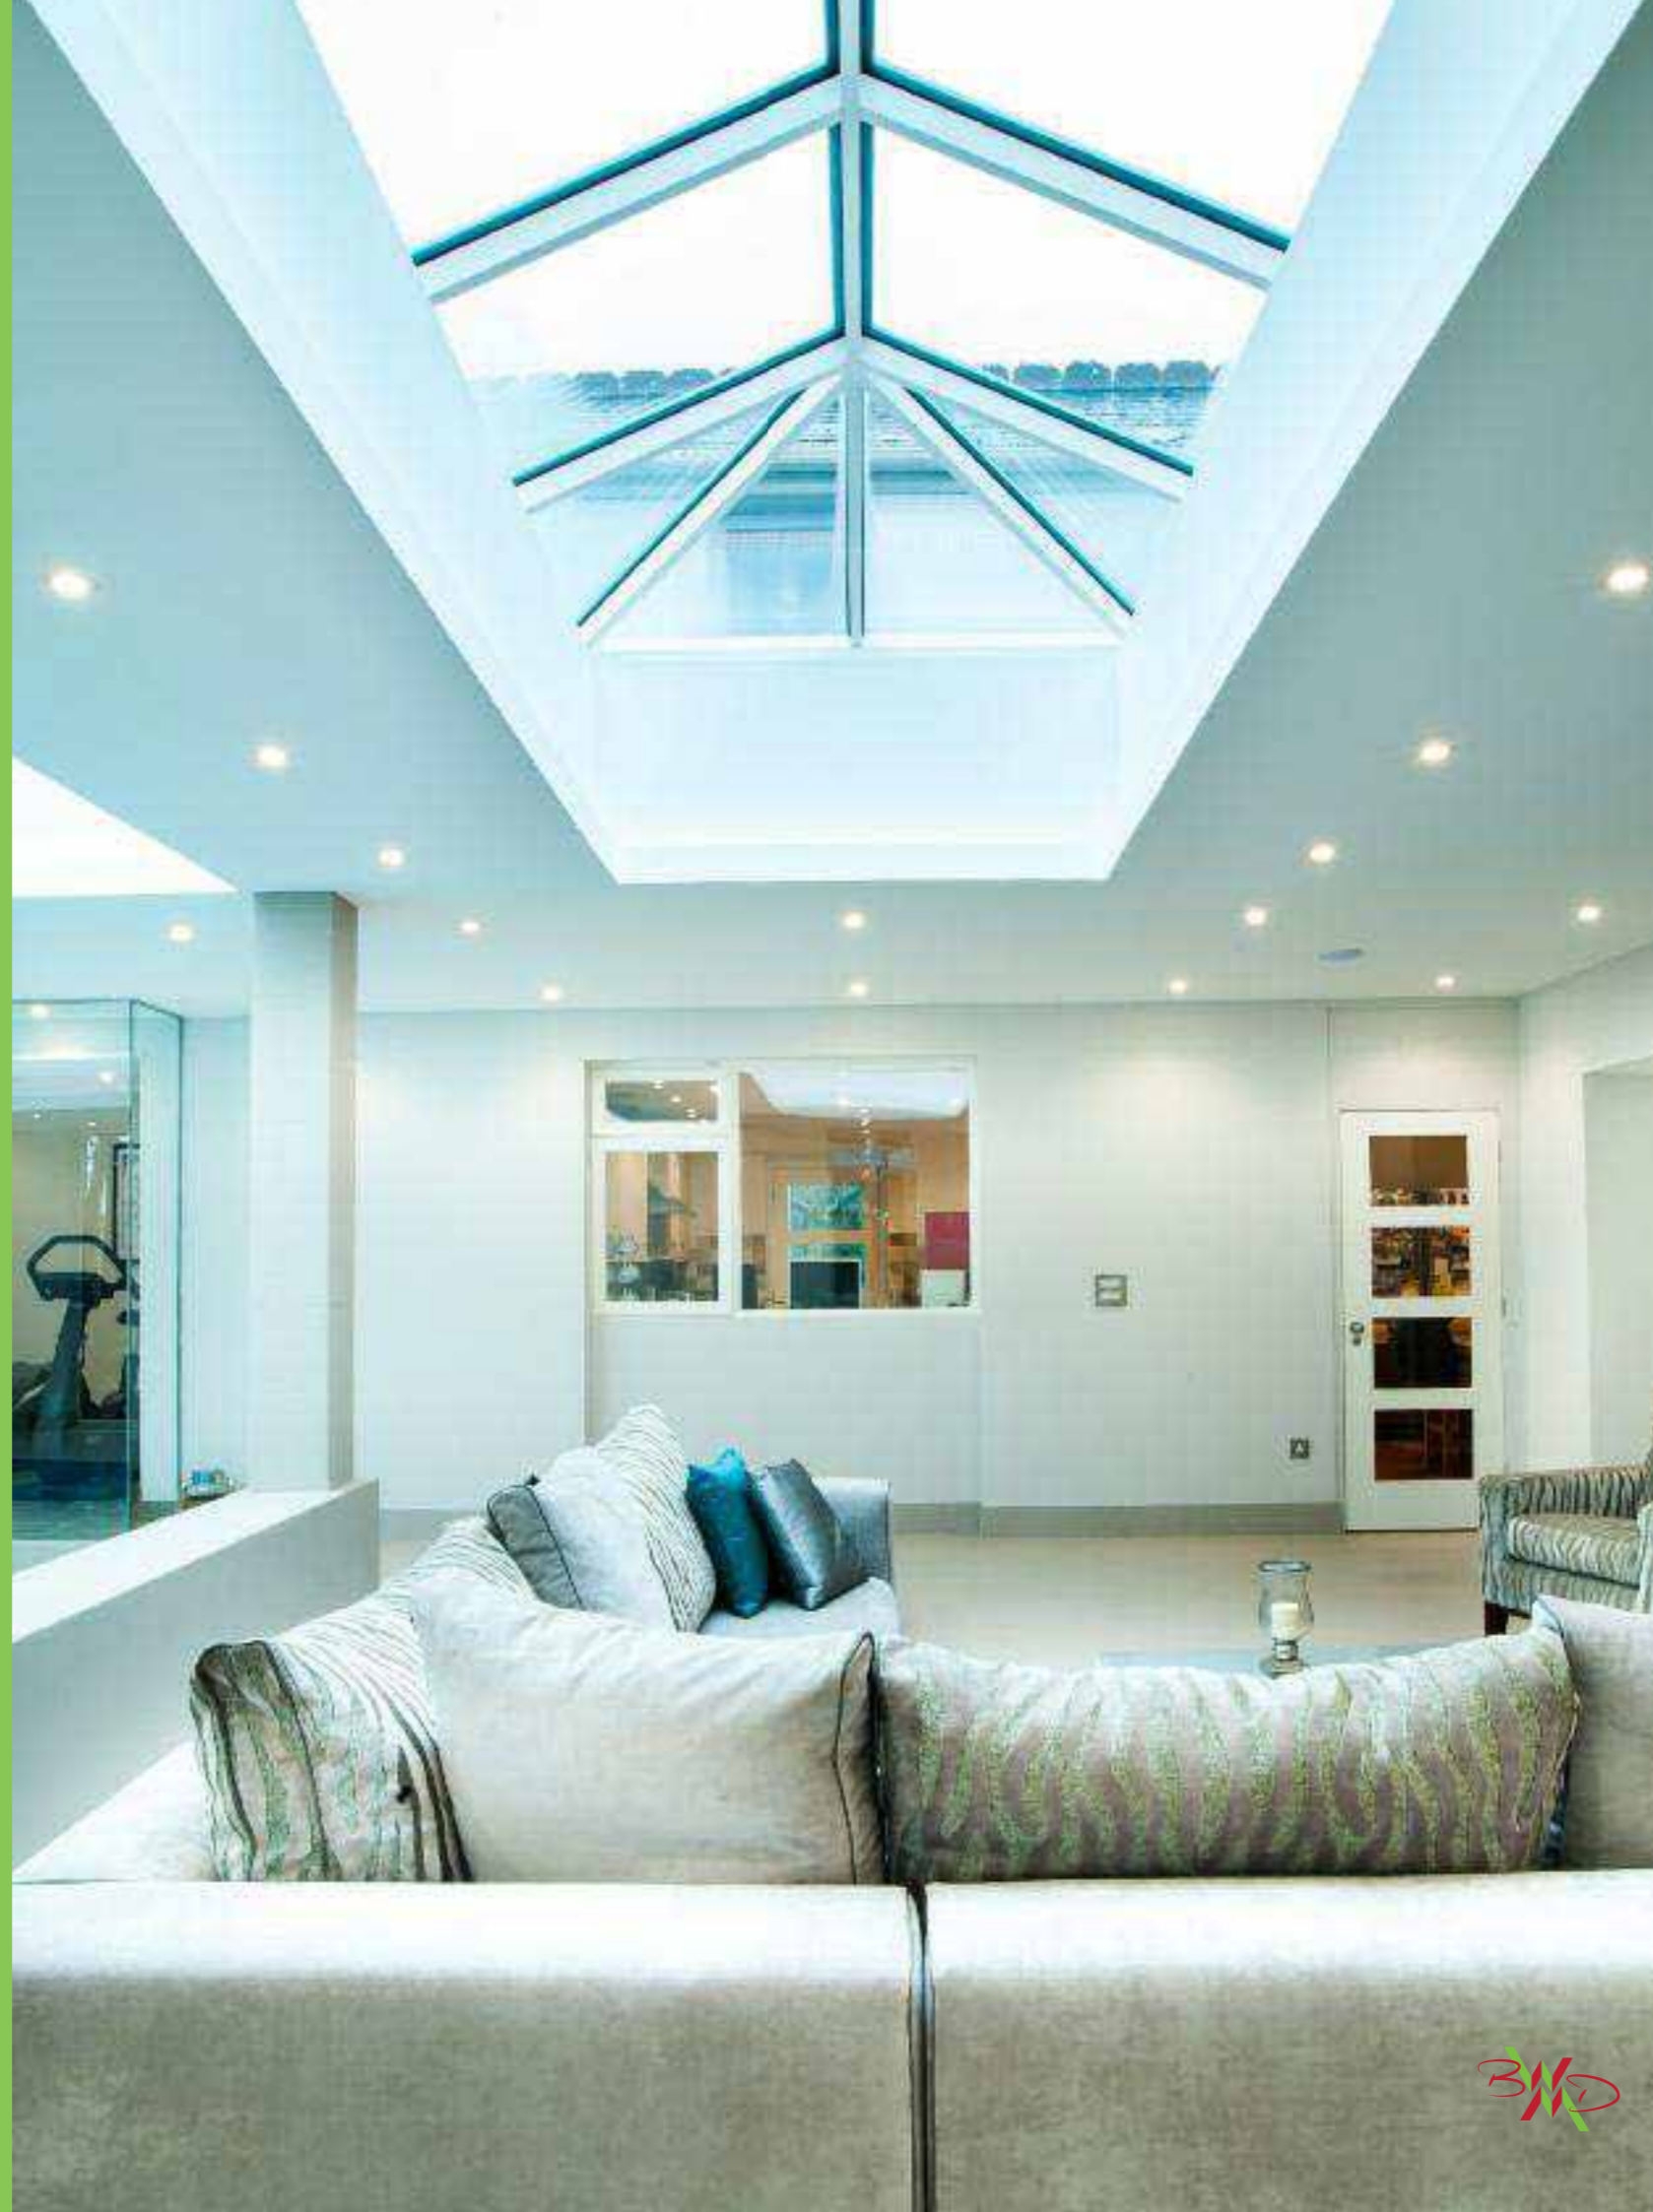

We have a passion for stylish aesthetics, engineering excellence and unparalleled thermal performance, which allows us to guarantee all our products.

Our Lantern Roof has been designed for year-round comfort with almost zero maintenance as it is the most thermally efficiency lantern on the market. it comes as standard with 'Bioclean' self-cleaning glass. designing and ordering is simple – up to a maximum of 5 metres wide with almost no length limitations.

Our Lantern Roofs are available with White or Anthracite grey ridges and rafters.

Glazing is available in either clear glass or glass with a blue tint. Your selection should be influenced by the style of your property, surrounding architecture and your other windows and doors.

“With Brendan Dillane WeatherMaster excellent quality and service comes as standard”

**Visual elegance
and supreme
performance**

Thinner, stronger, sleeker.

- The slimmest lantern solution in Europe
- No clunky bars and supports
- No obtrusive profiles dominating the glazing
- 40mm aluminium rafters, 30% slimmer than conventional systems
- Ridge 70% slimmer than conventional systems
- Warm in winter, cool in summer
- Comfortable year round room use
- Excellent thermal properties
- Bespoke roof sizes made to order
- Up to 5 metres wide and almost no length constraint.

Aluminium Lantern Roof

Take a closer look. The credentials of the BDWM Lantern Roof far exceed the specifications of other Lantern Roofs.

Key features

- KATpod - the slimmest lantern roof in Europe
- Minimalist modern design with ultra slim sightlines
- Ireland's most thermally efficient aluminium roof system
- Clean, low and slim sightlines
- Independent tests prove our BDWM Lantern Roofs offer the best thermal and strength performance available in the Irish domestic conservatory market.

FRAME COLOUR

External frame colour options

- White
- Anthracite grey
- Black

Internal frame colour options

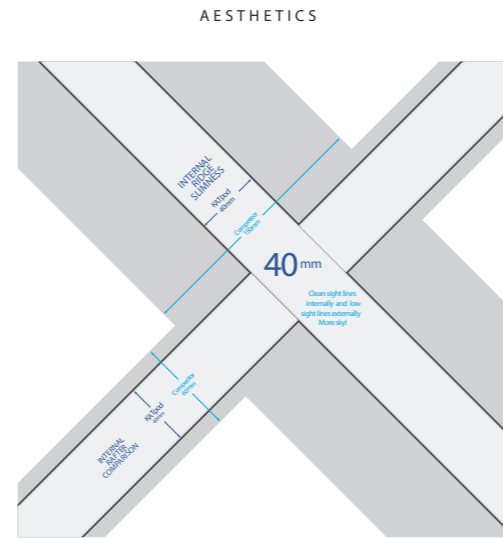

- White
- Anthracite grey
- Black

Glazing

- Double or triple glazing
- Bioclean self cleaning
- Low emissivity
- Toughened
- Neutral or blue tint

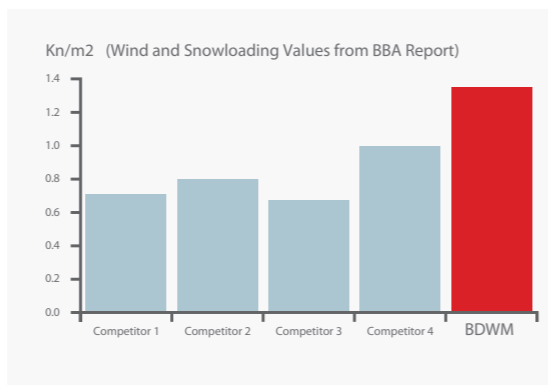

Kerb upstand

Lantern Roofs should be mounted on an upstand on top of the flat roof.

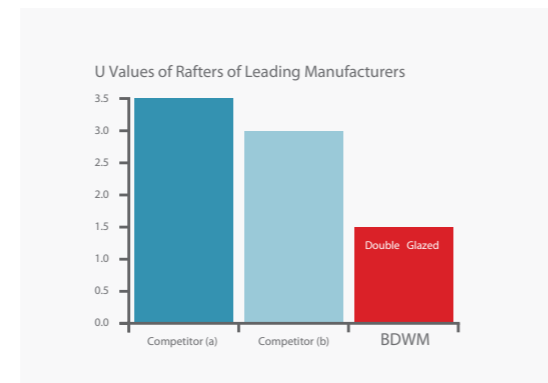

- Rafter is 30% slimmer than competitor products
- Ridge is 70% slimmer than competitor products

LOAD CAPABILITY

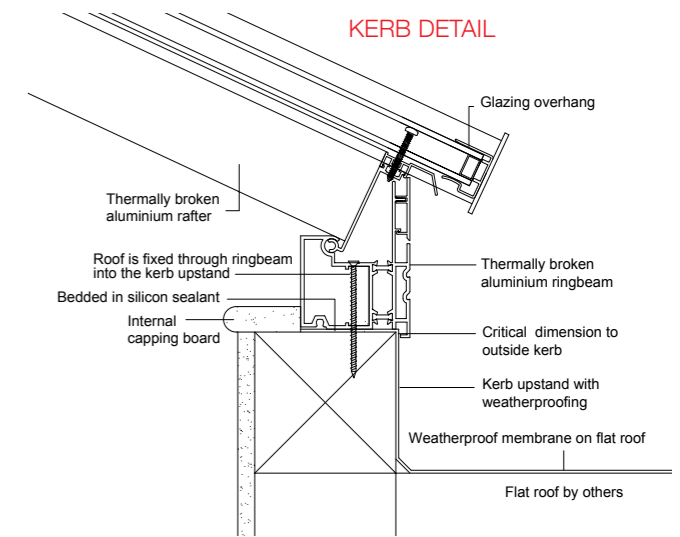

- Wind and snow loading values exceed closest competitor by 40%

THERMAL EFFICIENCY

- Our Lantern Roof with double glazing is twice as thermally efficient as nearest competitor

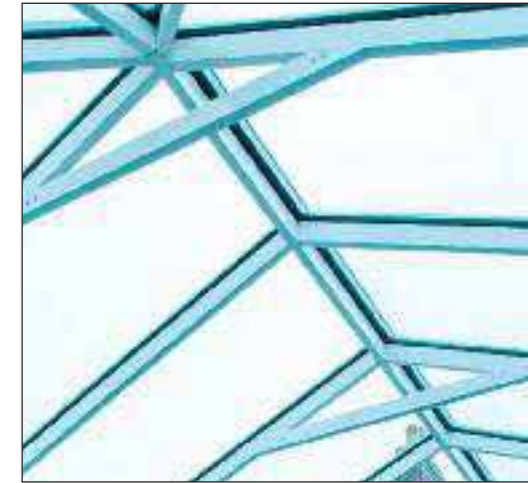

Discrete tie-bars for extra structural rigidity, without detracting from the sense of light and space.

Roofs up to 2.5m wide - no tie bar

Roofs 2.5m-3.8m wide - hidden tie bar

Roofs 3.8m-5m wide - slim tie bar

Aluminium Windows

BDWM Aluminium windows are hand-made to your bespoke dimensions and are fitted with modern window furniture. These slim, strong windows are manufactured with smooth operation, high security and low maintenance in mind.

Frame colour

your windows are available in:
